I'm a senior full-stack software engineer specialized in .NET, SQL, testing, React/Angular and Azure/AWS (in that order). I have worked in a lot of different projects and I always try to deliver the best quality, tested and clean work possible to the client and to maximize productivity for me, the team and the business. I can provide references.

Work Experience

11 years

Parser - **Senior Full Stack Engineer .NET / React / Angular** Jul 2024 - Jul 2026 / 2 years

Tech: .NET 10 API, Angular 19/21, Bootstrap, SQL Server, Azure, GitHub Repos and Actions, Unit/Integration testing, ASP.NET Core APIs, Microservices, React, RTL, Jest, MSW, Stryker, Pact testing, PostgreSQL, GCP, GitHub Copilot, MediatR

Chambers: Joined a new full Parser team to help Chambers develop a new landing page for legal firms for submitting their info so they can get ranked and listed in Chambers platform. This way they can get more clients with their verified reputation and reach to potential ones. 100% English speaking work environment.

dunnhumby: Joined the team to help building more features for the dh assortment app for the Walmart client. The app helps core retail decision makers to know what products they should have in the store, the quantity, the substitutes, the order of them, the impact on the changes they do and more. Helped the client a lot with automated testing in API and UI. 100% English speaking work environment.

UST España - **Senior Full Stack Engineer .NET / React / Azure / SQL Server** Jul 2023 – Jul 2024 / 1 year

Tech: React, Enzyme, React Testing Library, .NET 6, ASP.NET Core Web API, Azure DevOps, Azure Data Factory, Azure Blob Storage, SQL Server, DACPAC, Automated testing, Specflow, xUnit

Schroders: Help UST to take on several applications from Schroders from a leaving external team. Joining a new created team and learning the new apps and their architecture. Apps related to regulation and reporting of investment funds like AIFMD. Helping BA's and new team members to achieve the objective to take over these apps and going on with new features and maintenance. 100% English speaking work environment.

Atlas – ATS Global - **Senior Cloud Engineer .NET / AWS** Aug 2022 - Jul 2023 / 1 year

Tech: Microservices, Docker, .NET 6, AWS Lambda, EventBridge, SQS, SNS, ECS, MongoDB, GraphQL, NUnit, Moq, FluentAssertions, RabbitMQ, CQRS, AutoMapper, Design Patterns, MediatR

Helping to develop a no-code application for the industrial 4.0 sector. Mostly focused on the backend services and the GraphQL gateway, working on adding new features, solving bugs and adding automated tests for every change. Always following best practices and SOLID when possible. 100% English speaking work environment.

Dimática Software - **Full Stack Developer .NET / Angular / Python / GraphQL** Apr 2021 - Aug 2022 / 1.5 years

Tech: Microservices, Micro frontends, .NET 5, Angular 11/12, Python 3.10, Azure DevOps, GitHub, TypeScript, MongoDB, GraphQL, Apollo GraphQL

NEXPLORE: Developing new application for the construction sector, focusing on gathering daily data of the current construction, storing the progress, problems and other data for further analysis. Using microservices and micro frontends as architecture, .NET and Python for backend and Angular for frontend. MongoDB as the persistent storage. 100% English speaking work environment.

UVE Solutions - **.NET Senior Backend Developer / DevOps Engineer** Nov 2019 - Apr 2021 / 1.5 years

Tech: .NET 4.6, C#, Jenkins (code pipelines), Groovy, T-SQL, Automatic Testing, SOLID, Design Patterns, Entity Framework Core, Dapper, SonarQube

Developing backend UVE Products for data quality and improvement. Helping the company to improve their codebase with the introduction of automatic testing, static code analysis, DevOps environment with Jenkins and best practices like DI, SOLID and design patterns.

Viseo - **Full Stack Software Engineer .NET / AngularJS / Azure / CosmosDB** Nov 2017 - Oct 2019 / 2 years

Tech: Microservices, .NET 4.5-4.7, .NET Core 2.0-2.2, C#, AngularJS, Azure Functions, Azure DevOps, Selenium, Unit/Integration tests, Application Insights

Iberia Express: Analysis and development of new functionalities or bug corrections for the webpage, frontend and backend. Building pipelines for builds and releases as DevOps. Monitoring using Application Insights and Azure Portal. Scrum management with Azure Boards. Selenium QA Automation with Azure Test Plans and Release Pipelines. Iberia Standard NDC Protocol Project (international, English as default language).

Mapex - **.NET Developer / DBA SQL Server** Dec 2016 - Nov 2017 / 1 year

Tech: .NET Framework 2.0, VB.NET, SQL Server 2008/2012/2014/2016, Windows Forms, T-SQL

Maintaining and developing the software of the factory which the operator uses for their production needs (MES/SCADA, Industry 4.0). Also developing office software for orders management and other functionalities.

Dipole RFID - **.NET Junior Developer** Jun 2016 - Nov 2016 / 6 months

Tech: .NET Framework 4.6, C#, SQL Server 2012, Entity Framework, WCF, Windows Mobile, SQLite, T-SQL

Developing RFID, NFC and barcode solutions for asset management. Developed the client desktop application and the software for the PDA's.

Visio d'Enginyeria - **.NET Junior Developer** Jun 2015 - May 2016 / 1 year

Tech: .NET Framework 4.5, C#, SQL Server 2012, A3ERP, Entity Framework, LINQ, Windows Forms, T-SQL

Develop extensions and complete external programs that interact with A3 Software to adapt it for the customers. SQL reports.
